

EFFECTIVE SKIN REJUVENATION

Powerlite® IPL for beautiful, healthy and younger looking skin.

Powerlite® IPL is a modern technology that takes your skincare to a new dimension. It repairs damages and ageing from within. The treatments are also **painless, safe and fast.**

Powerlite® IPL is based on Intense Pulsed Light (IPL) that effectively treats damaged skin and slows the effects of the skins ageing process from within.

As well you can in just a few treatments remove sun damages, age spots or superficial blood vessels with **Powerlite® IPL.**

Powerlite® IPL treats all layers of your skin equally, both superficially and deep down.

The **Powerlite® IPL** treatment can be done during a lunch break and gives no down time.

Powerlite® IPL has gone through product development, tests, scientific research and follow-up, all in close cooperation with medical doctors and skin therapists.

POWERLITE®

WHEN YOU WANT RESULTS

Powerlite® IPL

Powerlite® IPL gives effect deep down in your skin and enhances elasticity and firmness by stimulating new collagen and elastin to be grown.

The light starts a natural process which builds new fresh cells from within.

The skin improvement continues for weeks after the treatment is finished.

Powerlite® IPL is medically certified.

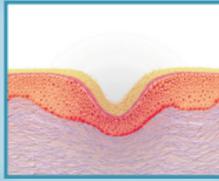

Powerlite® IPL - the natural choice when you want results.

RECOGNISED, ACCREDITED
AND RELIABLE

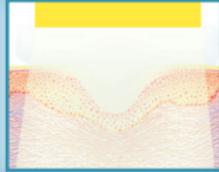

Skin rejuvenation

1

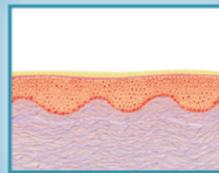

The skin is exposed and destroyed by several factors. Creases, like fine lines and wrinkles, appear in the skin and often makes it feel lifeless.

2

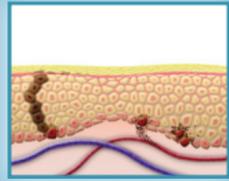

The light from a Powerlite® IPL penetrates the skin and transforms to heat-energy. The light starts a natural process which stimulates a renewal of collagen so that new and healthy cells are built from within.

3

Collagen and elastin fibres returns and you retrieve the skins firmness at the same time as fine lines and enlarged pores are reduced.

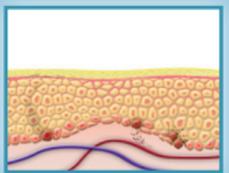

Sun-damaged skin

Ageing, sun and a stressful lifestyle leaves traces such as age spots, sun damaged skin, pigmentations and superficial blood vessels.

The light from a Powerlite® IPL penetrates the skin and transforms to heat-energy. The target area, for example a pigmentation mark, is heated and destroyed without damaging surrounding tissue.

The spots disappear with the skins renewal process. The result is a skin that is smoother and more beautiful.
