

POWERLITE®

WHEN YOU WANT RESULTS

TESTIMONIALS FROM SOME OF OUR DOCTORS:

MD. PhD. Pyra Haglund

Stureplanskliniken, Stockholm/Göteborg/Malmö, Sweden

“I have been working with the IPL technique more than 10 years, and during the last years only with Powerlite”.

“It is very efficient, safe, handy and fast”

- It is very efficient – especially for hair removal it has a clear advantage.
- It is safe. Thanks to its unique pulse and cooling system I can work on high energy levels with very small risk of burning.
- It is handy and fast. Large spot size and lightweigh handles are important aspects.

MD. PhD. ChungHun Huh

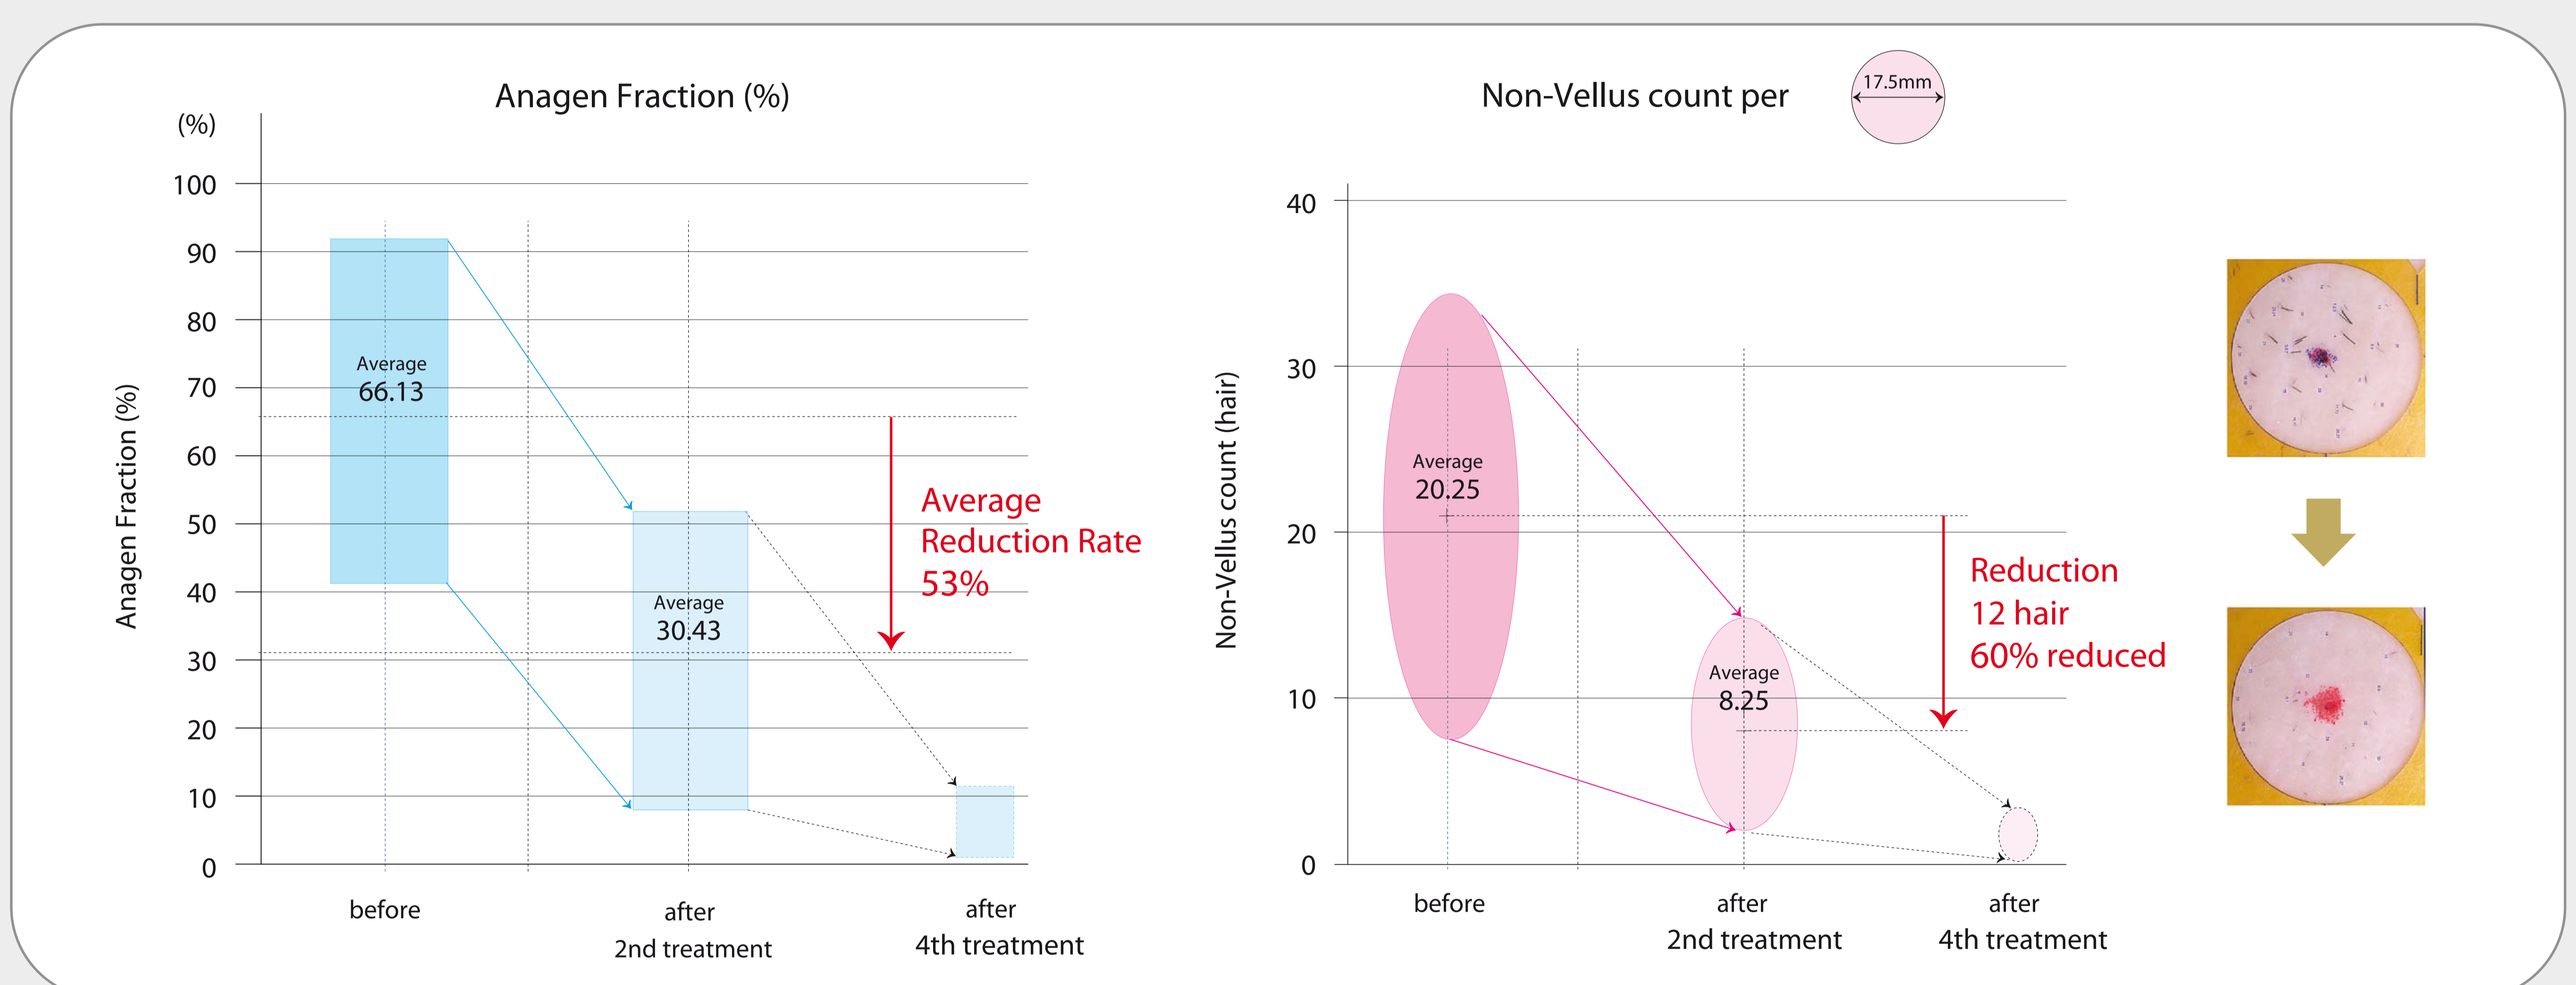

Department of Dermatology, Seoul National University Bundang Hospital
Rich Hair Clinic, Seoul, Korea

“It is proven that Photo Epilation using Powerlite600® IPL system is effective.”

Hair reduction study using photo-trichogram.

N=13, Treatment areas: axillaes (23), no of treatments: 2

MD. PhD. Justin Dobrescu

Specialist in Dermatology, Department of Dermatology
Borås Hospital, Sweden.

Hair removal study with Powerlite600®.

N=30, aged 17-70, men & women, skin type 2 + 3
Fitzpatrick, Hair blond – dark brown,

Treatment areas: face, axillae, bikini line, leg, back. No of treatments: 2-4.

Results

74% of patients experienced good results according to subjective evaluation, confirmed in clinical evaluation (70 – 100% hair removal). The remaining 26% had a clinically confirmed hair removal of more than 50%.

The best result achieved on patients with thick dark hair (> 82% hair removal). For those with blond thin hair, more treatments were needed.

RECOGNISED, ACCREDITED AND RELIABLE
